

THE ASSET
TRACEABILITY
PACKAGE
FOR VALVES

Expect... **AVR**

AVK VALVE INSTALLATION TRACKER is a new asset management system* utilising a purpose-built, user-friendly mobile app and web portal.

The AVK Valve Installation Tracker gives you full traceability of your assets providing data of each valve installed. Furthermore, it gives the opportunity to review the quality of the installation. The GPS pin location combined with a picture of each installation gives you a complete, accurate and auditable record of every valve installed. All data recorded can be exported into standard data formats for integration into existing mapping systems.

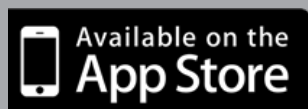

Full traceability in a few simple steps

A QR code is generated when the valve successfully passes all relevant test procedures at AVK. It assigns a unique serial number for the product which is linked to the full material and test records. When the valve is installed, the data record becomes complete from raw material to accurate position and application.

*Patent pending

DOWNLOAD THE AVK VALVE INSTALLATION TRACKER FROM:

THE APP

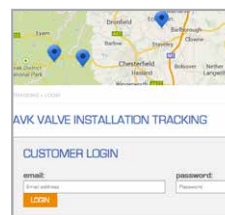

THE PORTAL

Scan QR code on valve

Location is set automatically via GPS

Secure customer login

Valve location on map (colours represent different pressures)

Take picture of valve installation

Add working pressure and comments

Photo record to be verified

Data record includes: valve type, materials, size, pressure and installer

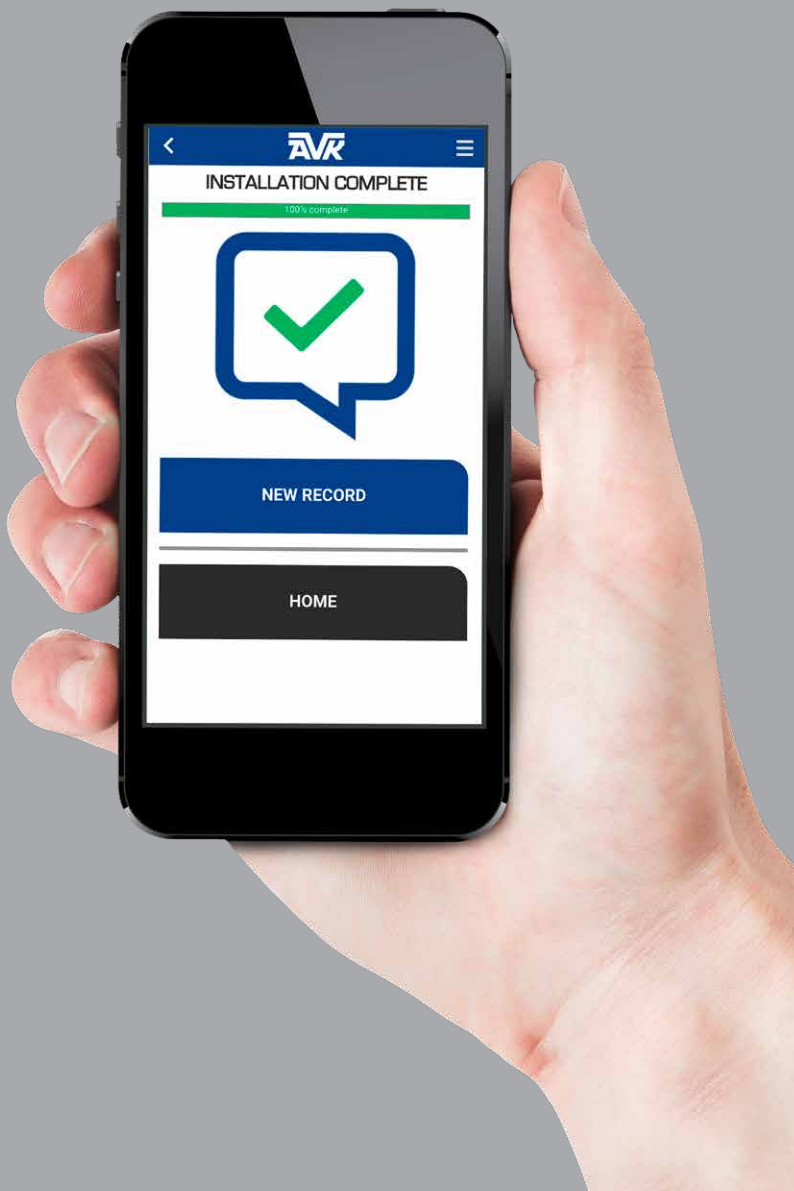

10 YEAR WARRANTY

AVK international A/S offers a 10 year warranty on all gas valves correctly recorded on the AVK Valve Installation Tracker. Further details are available on request. Subject to terms and conditions.

THE AVK VALVE INSTALLATION TRACKER HAS ALL YOU NEED TO MANAGE FUTURE TRACEABILITY

You have access to the data recorded via a user-friendly web portal providing accurate valve records at a glance.

- RECORD INDIVIDUAL VALVE INSTALLATIONS
- REGISTER ACCURATE GPS PIN LOCATION
- AUDIT THE INSTALLATION QUALITY VISUALLY
- EXPORT DATA INTO STANDARD FORMATS
- MAKE PERIODIC INSTALLATION AUDIT REPORT
- IMPROVE ASSET TRACEABILITY
