

Product Manager at AVK International A/S

Would you like to be part of the Product Management team at AVK International A/S with responsibility for the product portfolio? And would you like to join a global organisation focused on growth, innovation and sustainable development?

We are entering an exciting phase of expansion in our production and product portfolio, with a focus on double-eccentric butterfly valves. Therefore, we are looking for a Product Manager to lead this segment. You will be responsible for a product package primarily for water supply including technical, commercial and strategic responsibilities, together with our team of product managers. You will work closely with the AVK Group's R&D, production, marketing and sales departments throughout Europe, while also playing an active role in our upcoming factory expansion.

Your key responsibilities:

As Product Manager at AVK international, you will have a wide variety of tasks, e.g.:

- conduct training/education of the European sales organisation
- participate in relevant exhibitions
- supervise the performance of AVK products and initiate improvements
- prepare technical and commercial texts in cooperation with our marketing department
- participate in product development
- monitor and analyse competing products
- support the sales organisation
- assist the quality- and sales departments in handling complaints as required
- represent AVK during customer visits from European sales companies

The ideal candidate is:

- decisive, dynamic and adaptable to change
- a qualified engineer or with another relevant technical education or equivalent experience
- responsible and able to take ownership of major

decisions

- action-oriented and able to drive things forward
- strong in interpersonal relations and able to cooperate across departments
- contributing to the commercial side and working closely with the sales team
- efficient, structured and impactful
- a natural leader, who takes responsibility and involves colleagues when necessary
- Thriving in face-to-face interactions with colleagues and valuing being part of a workplace where no two days are the same and the pace is high

We offer:

For the right person, this will be a highly independent, exciting and challenging position working with high-quality products and solutions. You will encounter both professional and personal opportunities for growth, and your development will be supported by skilled and committed colleagues in a supportive and collaborative environment.

The culture at AVK is entrepreneurial and characterised by strong specialists, a positive attitude and high commitment. You will have full support from your colleagues and achieve strong results through teamwork. You should expect 20–40 days of travel per year.

Are you ready to make a difference?

We look forward to hearing how you can contribute to our team with your expertise and passion. We conduct interviews on an ongoing basis and look forward to welcoming our next team member. Don't wait too long – take the next step in your career by sending your CV and motivation letter to hr1@avk.dk today!

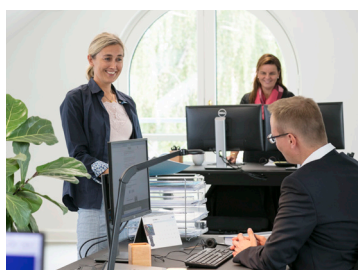

The AVK Group

The AVK Group is a global market leader within valves and hydrants. AVK valves are part of vital infrastructure systems that include potable water distribution, wastewater treatment, distribution of natural gas and fire protection. AVK is a family-owned company with headquarters in Skovby/Galten near Aarhus and has more than 100 production and sales companies worldwide and approx. 5,300 employees.

AVK International A/S

AVK International A/S manufactures valves and accessories. We offer a wide selection of high-quality products to Continental Europe, Central Asia, the Caucasus and Northern Africa. We have approx. 230 employees and had a turnover of just over DKK 700 million in 2023/24.

AVK is recognised across the world for its high-quality products and contributes to sustainable solutions to global challenges, e.g. to minimise water loss and to handle wastewater efficiently.
